

iPBX

How to benefit from PBX hosting

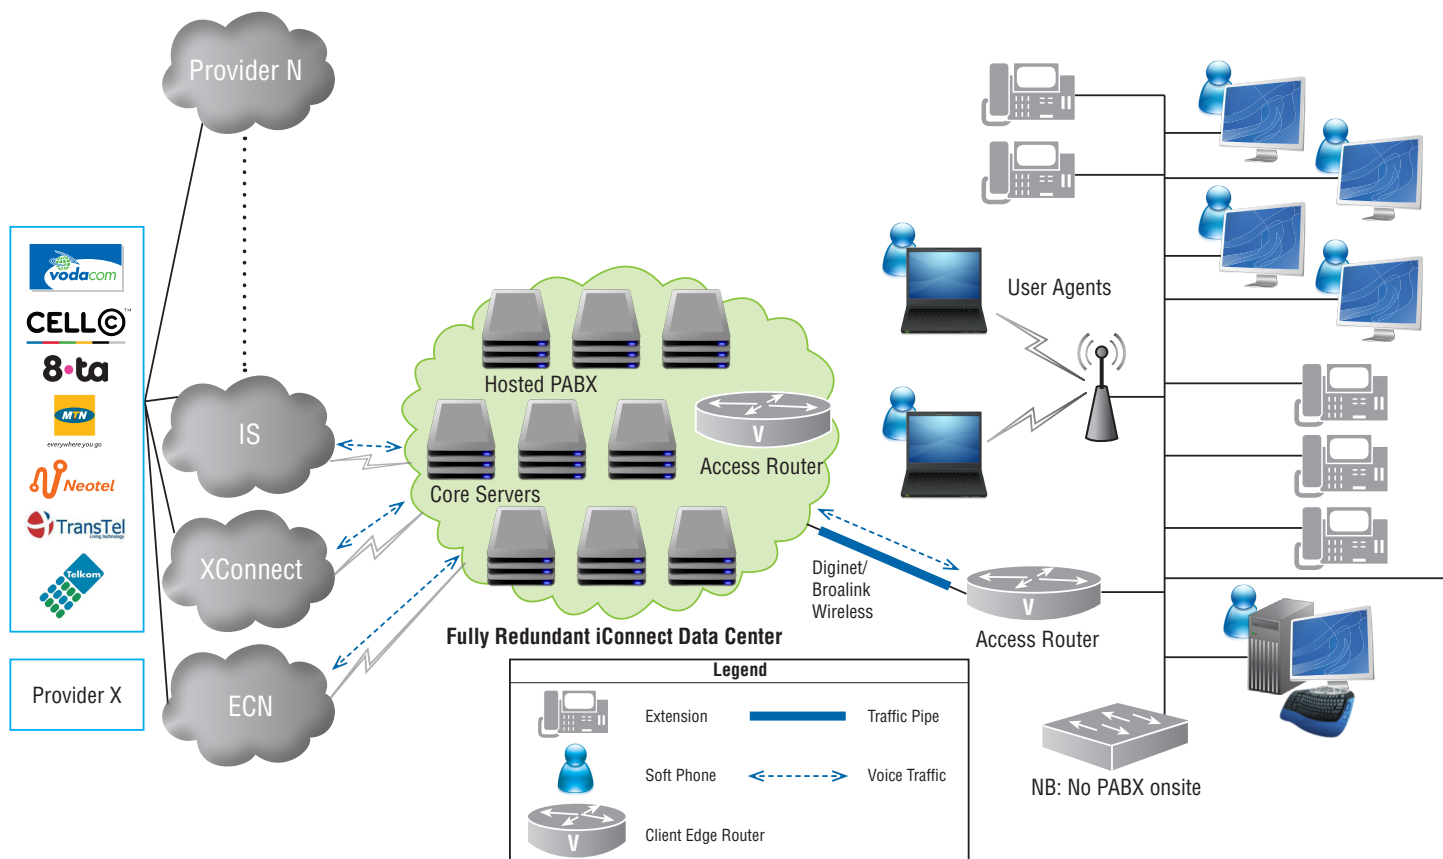

iConnect's Hosted PBX is more than just a cost-efficient solution. It offers you a full and sophisticated PBX system without the need for a costly physical unit on site. That's thanks to iConnect's Hosted PBX, which resides in a cloud environment, and all handsets are automatically configured from this hosted facility.

Whatever the size of your organisation, your needs can be accommodated. Even multiple branches are able to connect to iConnect's single, cloud-based PBX. It's the ultimate answer,

since all you pay is a monthly rental per extension which covers handsets, installation, maintenance, support and all future moves, additions or changes. You'll have a system that's both flexible and truly future-proof.

The exceptional value of iConnect's Hosted PBX is proved by the fact that over a five year standard PABX contract term, the total cost of ownership of iConnect's No 1 hosted PBX is half that of a conventional PABX with significantly increased functionality.

iConnect Virtual Hosted PABX Solution

What the system can do for you

iConnect's Hosted PBX offers all of the functions of traditional PABX systems plus an additional complement of high-end features, including:

- Auto provisioning
- Interactive Voice Response (IVR)
- Voice recording
- Voicemail
- Vacation messaging
- Dial plan
- Pin codes
- Speed dial
- Call divert
- Caller line identity

All your benefits

While iConnect's Hosted PBX solution provides all the functions of a conventional PABX system, you'll find the benefits far in excess. For instance:

- The cost of ownership is significantly less
- Should you relocate, add or reduce staff, the Auto Provisioning will automatically accommodate all moves, additions and changes
- The complete flexibility of the system caters for quick and easy expansion

- All the additional functions come at no extra cost
- Call-out charges and maintenance costs are a thing of the past since maintenance of iConnect's Hosted PBX system is done remotely, with no inconvenience to your company
- Having one provider means you receive only one bill for all your business communication needs.

How do you connect to the system?

iConnect will make a site visit and assess the network-readiness of your existing infrastructure. We will then recommend any changes that need to be made, after which we will work with you to draw up full dial-plans based on your requirements.
